

City of Hamilton

Focus

I will bring a Glanbrook perspective for city plans to our Economy, Environment and Social Issues.

Job Creation, Development, Infrastructure.

Transportation, Carbon reduction, Emergency Preparedness.

Affordable Housing, Homelessness, Poverty, Taxation and Equity.

These all-important issues require us to think globally and act locally to better our city now and prepare for the future.

A vibrant and flourishing Hamilton makes for a better Glanbrook.

Carbon Reduction Plans & Readiness for Environmental Impacts

I fully support our city's Community Energy and Emissions Plan (CEEP) and the Climate Change Impact Adaptation Plan (CCIAP). This will foster an economy that provides employment and supports movement towards a cleaner and carbon-neutral economy. I support the LRT and other city initiatives that help the environment and create jobs. I believe this is our best bet for a prosperous city now and in the future.

Conditions such as extreme heat, severe floods, blizzards, ice storms and changing lake levels, require a councillor who sees these climate threats as serious. I will back the City's efforts to proactively prepare for climate emergencies so we are ready with plans in place to deal with them as they occur.
